DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-4 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 9, "said device" is unclear which one of the output device and the different device" in line 4 the applicant is referring to.

Claim 3, line 3, "a kind of the plug" is unclear. Please clarify what kind the applicant is referring to.

Claim 7, line 6, "the pertinent kind" is unclear. Please clarify.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-2 and 5-6 rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (APA) (page 2, lines 20-24 of the specification) in view of Kwon et al (6,667,987).

Art Unit: 2661

Regarding claims 1-2, the APA discloses in which an output device can sent an order for setting so that output data of the output device may be inputted to a data input section of the input device, the input device conducts input setting based on the order (see page 2, lines 20-24 of the specification setting a communication between an input device and an output device). The APA does not disclose the output device can sent a request for cancellation of the input setting. However, Kwon discloses a method and a system in which a setting requested by a output device can be cancelled (see col. 3, lines 19-45). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to cancel the setting as taught by Kwon in the system of the APA in order to control the transmission between output devices and input device.

Regarding claims 5-6, claims 5-6 are apparatus claims that have substantially all the limitations of the respective method claims 1-2. Therefore, they are subject to the same rejection.

Allowable Subject Matter

5. Claims 7-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 3-4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
